

SDI LAFARGA  
COPPERWORKS™

# EXPERT ENGINEERING TO OPTIMIZE YOUR OPERATION

Since 2010, SDI LaFarga COPPERWORKS™ has been squarely focused on copper rod and wire. That in-depth focus has grown a team of engineers with combined expertise in all aspects of copper rod and wire, from drawing and annealing to mechanical and electrical maintenance, process troubleshooting and more. Sharing this knowledge and engineering expertise is one more way COPPERWORKS is providing differentiated services to customers that drive their operational success.

## OVERVIEW

### YOUR PARTNER IN PRODUCTIVITY

Need to calibrate your equipment to run **Infinity™ Copper Wire**? Looking for a way to maximize your output and quality? Have an issue you need to troubleshoot? The **COPPERWORKS** engineering team is ready with the answers. They'll travel to your location and work alongside your team, advising them on the most efficient use of our products, saving you time and money. Consider **COPPERWORKS** an extension of your team, providing expertise and bandwidth—like you'd expect from a true partner.

*"You can see our company's can-do attitude and innovative culture in every one of our engineers. We are experts in copper rod and wire, using our knowledge to build deeper relationships with our customers and help them get the most out of our products."*

**Matt Reinoehl** — Engineering Supervisor  
SDI LaFarga COPPERWORKS

### OUR ENGINEERS "CAN-DO" IT

In our years of working alongside our customers at their locations, we have provided a wide range of services to enhance their efficiency. For example, we meet with customers to assess their equipment and determine how our **Infinity** copper will run on it. We discuss oxidation and annealing, as well as evaluate the customer's current performance of their existing copper supply. These and other services are performed with the goal to help customers fine-tune their equipment to run our products in the most efficient way possible.

**WHERE COPPER WORKS.** Our team of expert engineers is ready to help you achieve greater efficiency and a better overall product. Contact our team today!
